

**Job Title:** Quality Analyst Test Engineer

**Location:** Sacramento, CA

First Corporate Solutions is searching for an experienced full-time automated QA tester. This position will be taking the lead on QA from our developers, so this is an opportunity to refine and expand QA testing procedures and establish standards.

**Job Summary:**

The QA tester will be testing UI input validation and operation, participate in UX and design, and conduct both manual and automated unit and integrated testing. Work will include the use of Visual Studio and Selenium to automate testing for web applications, APIs, and method of testing MS SQL procedures. Automated test experience and C# development is absolutely necessary.

The ideal candidate must be able to build tests within the framework, conduct unit testing and integration builds and tests in an Agile Scrum environment. The candidate will be responsible for creating test cases from technical or functional requirements with both manual and automated testing. Tester will need to understand logs and program flow for white box tests.

Other duties: This position will be a backup to our Data QA who conducts QA on the incoming public records data, and there will be opportunities for software development and code reviews.

**Required Skills:**

- 3+ years of automated testing experience
- Unit Testing and Integration build/test experience
- Visual Studio & C# including MVC
- Test plan creation experience
- Experience with automated QA tools (Selenium preferred)
- Performance Profiling
- Regression testing
- Experience in writing test requirements and test cases
- Microsoft Office expertise, especially Word/Excel
- Good writing and verbal communication skills

**Education:**

- B.S. Computer Science preferred

**Additional Desired Skills:**

- Microsoft SQL 2008
- Atlassian Jira
- Team Foundation Server Code Repository
- Agile Scrum Development Techniques
- Microsoft Office Suite and Vision
